

City of Copenhagen

An aerial photograph of Copenhagen, Denmark, showing a dense urban landscape with numerous red-roofed buildings, green-tiled roofs, and a prominent church spire. A canal or river flows through the city, with a bridge crossing it. The sky is clear and blue.

Head of Program
Circular Copenhagen

**SAMMEN
OM BYEN**

KØBENHAVNS KOMMUNE
Teknik- og Miljøforvaltningen

Adopted December 2018

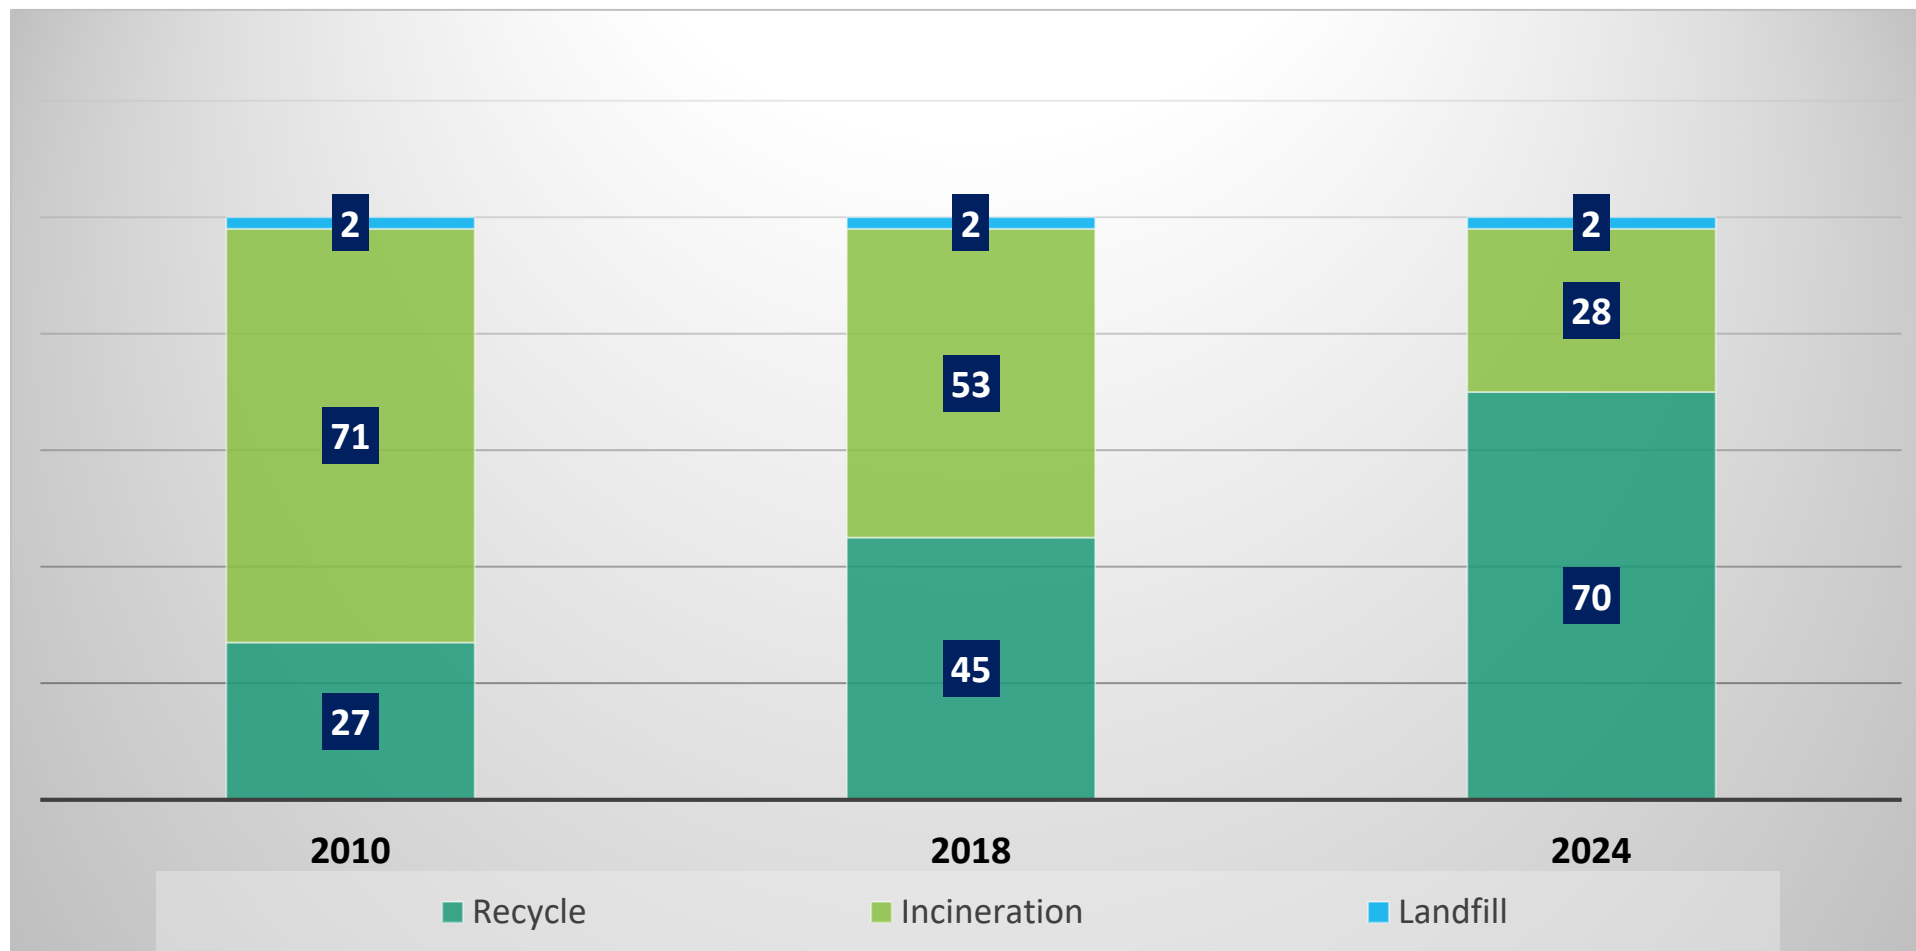

Recycling
70 %

Trible
Reuse

CO₂
Neutral KBH

- Expected costs: 110 million EUR

From incineration towards circularity

Total amount of household waste in CPH:
~ 180,000 tonnes per year

Total amount of waste collected from recycling centres:
~ 40,000-45,000 tonnes per year

More source separation

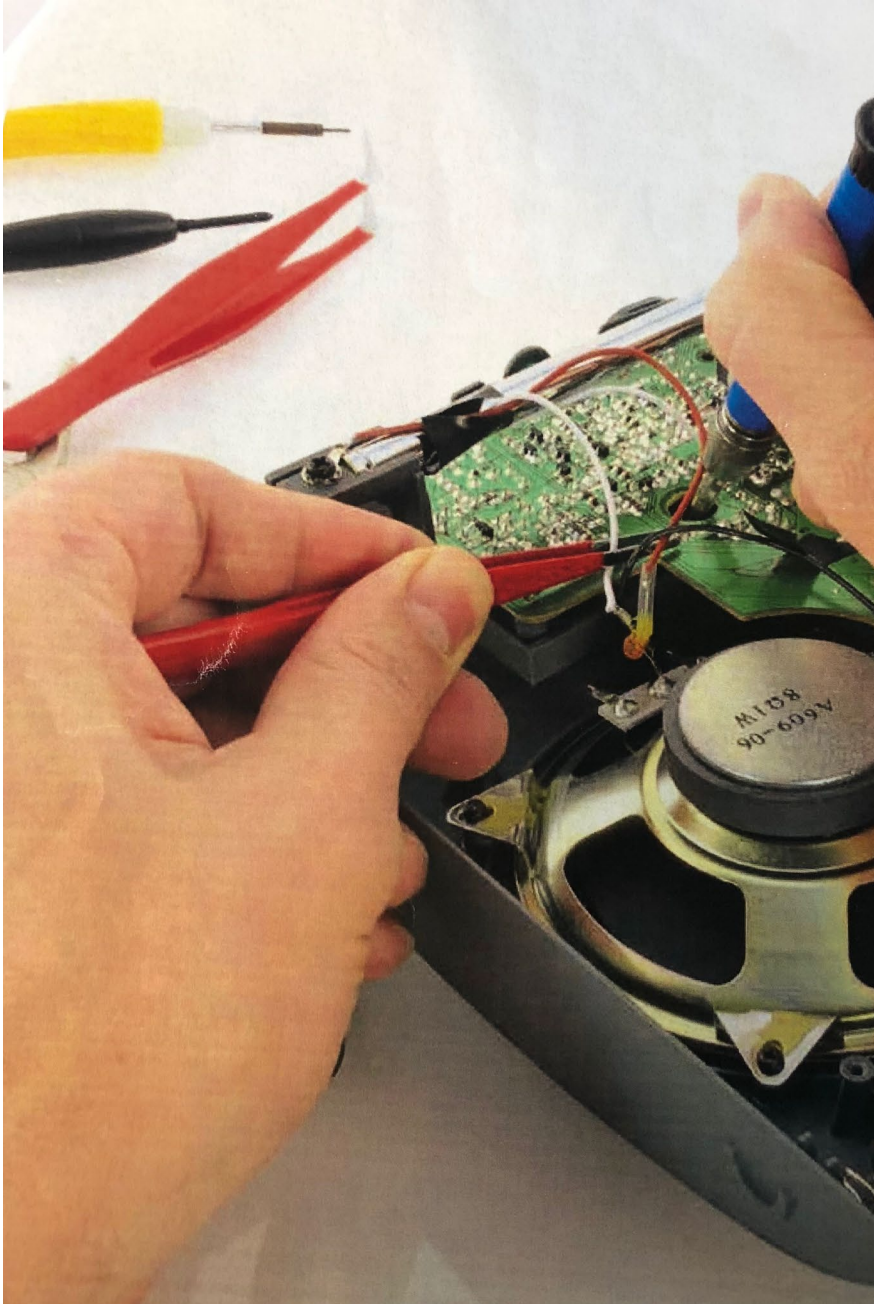

Develop existing and future
collection systems

More swap and reuse activities

New technological solutions for
waste management

Increase and support
circular economy

Thank you!
